HOW DOES YOUR STATE COMPARE?

2021

TAX FOUNDATION

In 1941, we introduced our first edition of *Facts & Figures*. “There is need for concise and accurate data,” we wrote. “Facts give a broader perspective; facts dissipate predilections and prejudices. . . [and] this collection of data is an important step to meet the challenge presented by the broad problems of public finance.”

Facts & Figures 2021: How Does Your State Compare? builds on these seven decades of tradition. Mailed to every state legislator and governor, this handbook is designed to be a pocket- and purse-sized guide to state rankings on tax rates, collections, burdens, and more. For easy accessibility, this publication is also available in our free Tax Foundation mobile app.

These tables were compiled by Tax Foundation staff and updated by Policy Analyst Janelle Cammenga. We hope these facts contribute to a healthy public debate.

PRINCIPLES OF SOUND TAX POLICY

As a nonpartisan, educational organization, the Tax Foundation has earned a reputation for independence and credibility. All Tax Foundation research is guided by the principles of sound tax policy, which should serve as touchstones for policymakers and taxpayers everywhere.

SIMPLICITY: Tax codes should be easy for taxpayers to comply with and for governments to administer and enforce.

TRANSPARENCY: Tax policies should clearly and plainly define what taxpayers must pay and when they must pay it. Disguising tax burdens in complex structures should be avoided. Additionally, any changes to the tax code should be made with careful consideration, input, and open hearings.

NEUTRALITY: Taxes should neither encourage nor discourage personal or business decisions. The purpose of taxes is to raise needed revenue, not to favor or punish specific industries, activities, and products. Minimizing tax preferences broadens the tax base, so that the government can raise sufficient revenue with lower rates.

STABILITY: Taxpayers deserve consistency and predictability in the tax code. Governments should avoid enacting temporary tax laws, including tax holidays, amnesties, and retroactive changes.

"Federal Intergovernmental Revenue" includes money transferred from the federal government to states. "General Revenue" includes all tax revenue but excludes utility revenue, liquor store revenue, and investment income from state pension funds. D.C. is designated as a local entity by the U.S. Census Bureau and is thus not included here.

State Individual Income Tax Rates

As of January 1, 2021

- (a) These states allow some or all of federal income tax paid to be deducted from state taxable income.
- (b) Local income taxes are excluded. Eleven states have county- or city-level income taxes; the average rates expressed as a percentage of AGI within each jurisdiction are: 0.10% in Alabama; 0.36% in Indiana; 0.11% in Iowa; 1.29% in Kentucky; 2.18% in Maryland; 0.17% in Michigan; 0.22% in Missouri; 1.47% in New York; 1.59% in Ohio; and 1.15% in Pennsylvania; data are not available in Delaware, where Wilmington imposes a municipal income tax. In California, Colorado, Kansas, New Jersey, Oregon, and West Virginia, some jurisdictions have payroll taxes; flat, dollar-denominated wage taxes; or interest and dividend income taxes. See Jared Walczak, "Local Income Taxes in 2019," Tax Foundation."
- (c) Bracket levels are adjusted for inflation each year.
- (d) Rates apply to individuals earning more than \$79,300 in Arkansas. Two special tax tables exist for low- and middle-income individuals: one for individuals below \$22,200 in income, and one for those between \$22,200 and \$79,300.
- (e) 2020 brackets due to data availability.
- (f) Connecticut and New York have "tax benefit recapture," by which many high-income taxpayers pay their top tax rate on all income, not just on amounts above the bracket threshold.
- (g) In New Hampshire, tax applies to interest and dividend income only.

Note: Brackets are for single taxpayers. Some states double bracket widths for joint filers (Ala., Ariz, Conn., Hawaii, Idaho, Kans., La., Maine, Nebr., Ore.). California doubles all but the top two brackets. Oklahoma doubles all but the top bracket. Some states increase but do not double brackets for joint filers (Ga., Minn., N.M., N.D., N.Y., Vt., Wis.). Maryland increases some but not all brackets. New Jersey adds a 2.45% rate and increases some bracket widths. Consult the Tax Foundation website for tables for joint filers.

- (a) Connecticut charges a 10% surtax on a business's tax liability if it has gross proceeds of \$100 million or more, or if it files as part of a combined unitary group.
- (b) Nevada, Ohio, Texas, and Washington do not have a corporate income tax but do have a gross receipts tax with rates not strictly comparable to corporate income tax rates. See Table 18 for more information. Delaware, Oregon, and Tennessee have gross receipts taxes in addition to corporate income taxes, as do several states like Pennsylvania, Virginia, and West Virginia, which permit gross receipts taxes at the local (but not state) level.
- (c) Florida's corporate income tax rate will return to 5.5% for tax years beginning on or after Jan. 1, 2022.
- (d) Georgia's corporate income tax rate will revert to 6% on January 1, 2026.
- (e) Illinois' rate includes two separate corporate income taxes, one at a 7% rate and one at a 2.5% rate.
- (f) Indiana's rate will change to 4.9% on July 1, 2021.
- (g) Mississippi continues to phase out the 3% bracket by increasing the exemption by \$1,000 a year. By the start of 2022, the 3% bracket will be fully eliminated.
- (h) In New Jersey, the rates indicated apply to a corporation's entire net income rather than just income over the threshold. A temporary and retroactive surcharge is in effect from 2020 to 2023, bringing the rate to 11.5% for businesses with income over \$1 million.

Note: In addition to regular income taxes, many states impose other taxes on corporations such as gross receipts taxes (Table 18) and capital stock taxes (Table 36). Some states also impose an alternative minimum tax and special rates on financial institutions.

(a) Virginia's tax is locally levied and rates vary by business and jurisdiction. Approximately half of counties do not levy the tax. Some counties instead levy a capital stock tax.

Note: Gross receipts taxes are complex business taxes imposed at a low rate but on a wide base of transactions, resulting in high effective tax rates that can vary by industry. These taxes also often have minimum taxes that can result in much higher effective rates for some small businesses.

(a) While Alaska does not have a state-level sales tax, it allows sales taxes on the local level.

Note: Some states levy gross receipts taxes in addition to sales taxes, which the U.S. Census Bureau includes in collections data. See Table 18 for information on gross receipts taxes. D.C.'s rank does not affect states' ranks, but the figure in parentheses indicates where it would rank if included. See Table 43 for people per household by state.

Note: Excise taxes are special taxes on specific goods or activities—such as gasoline, tobacco, or gambling—rather than general tax bases such as income or consumption. Excise taxes are often included in the final price of products and services, and are hidden to consumers.

The American Petroleum Institute (API) has developed a methodology for determining the average tax rate on a gallon of fuel. Rates may include any of the following: excise taxes, environmental fees, storage tank taxes, other fees or taxes, and general sales tax. In states where gasoline is subject to the general sales tax, or where the fuel tax is based on the average sale price, the average rate determined by API is sensitive to changes in the price of gasoline. States that fully or partially apply general sales taxes to gasoline are California, Connecticut, Illinois, Indiana, Michigan, and New York. D.C.'s rank does not affect states' ranks, but the figure in parentheses indicates where it would rank if included.

Manufacturing value generally refers to the value paid by wholesale. Wholesale value refers to either the price paid by the wholesaler or the price paid by retail to wholesale.
