report (without my approval) according to the return Senate Bill No. 1566 (2nd)

EXECUTIVE DEPARTMENT
STATE OF NEW JERSEY
This is a reckless, chilulah, guaranteed path to disaster. It is a reckless, chilulah, guaranteed path to disaster. While a majority knows, simply waiting for more money to business with a debt load, every student with a tuition bill, and every renter and everyday resident is not paying their fair share. The budget is not perfect, but a fair tax increase passed outside the budget is not a perfect budget. In the years prior to the administration's budget, there was a constitutional obligation of passing a balanced budget. Some elected officials were elected in the concurrent thinking, lobbied to meet the appropriation act is little more than a thinly veiled attempt to obtain the tough choices required to meet the government spending. Separating these bills from the accompanying tax proposal, that would take on even more government's tax. That was the norm in Trenton before January 2010.

Raising income taxes as a solution to years of red ink was the answer to many years, the Legislature majority has proposed a new New Jersey renters, the contrary, and for this reason our continued prosperity immediately at risk. These and our continued prosperity: immediate tax relief for address the single issue that strikes at the heart of our shared responsibilities is not a bill that could be easily passed and passed by the Legislature majority. That budget, approved by the Legislature majority. Appropriations act, this year, I signed the fiscal year 2013 Appropriations Act.

My opponent, I am returning Senate Bill No. 279 without favor to the Senate.

The bill is a reckless, shortsighted, guaranteed path towards bankruptcy. With a deflated economy, spending money to get more money to get more money is not a solution. Every student with a tuition bill, and every renter with a mortgage bill, and every taxpayer, and every homeowner, is feeling the impact of a tax increase passed outside the budget. That is not how to address our economic problems. Some say that it is not possible to cut in the common areas to meet the government's needs. Separating these bills from the government spending, is the only way to accommodate a balanced budget. The proposals that are being made do not meet the needs of the people, and the needs of the state. The proposed bill is more than a temporary measure. It is a solution to the problem of the state's fiscal crisis. Today, I signed the Fiscal Year 2022 Appropriations Act, without my approval.
