How $1.05 Trillion* Pelosi Health Reform Bill Is Financed

- Surtax on High-Income Individuals, $460.5 (38%)
- Pay or Play Provisions for Employers, $135 (11%)
- Net Cuts to Medicare, $472.8 (39%)
- Corporate income tax increases and other non-health revenues, $50.4 (4%)
- Tax on medical devices and other health care revenue/tax increases, $55 (5%)
- Penalty for Uninsured Individuals, $33 (3%)

Tax Foundation calculations using CBO/JCT scores; pie chart components sum to $1.2 trillion, not $1.05 trillion due to the fact that Pelosi's cutting of the deficit by $104 billion and increases to non-coverage health care spending must also be financed.
